Tech & features

Built from recycled 2.5-layer Pertex® Revolve fabric with a fluorocarbon-free DWR treatment, the Downpour Eco is a monopolymer waterproof jacket.

It uses a polyester outer and membrane, which means that, in addition to being 100% recycled, it also has the potential to be recycled at the end of its life much more easily than waterproof fabrics made from multiple polymer layers. Adjustable hem and cuffs and a pair of deep-venting pit zips enable you to tweak the fit and ventilation as conditions demand. The hood with polymer peak is two-way adjustable for reliable visibility and the zipped handwarmer pockets are large enough for a map.

Light and packable, with a weight of just 280g, this is the go-to jacket for hikers who demand more sustainable gear as well as performance.

Fit: Regular

Weight: 280g/9.9oz

Centre back length: (Size 10): 69cm/27.2inch

Hydrostatic Head: 20,000mm

Breathability (MVTR): 20,000g/m²/24 hrs
